

COLFERT Terra

Soil Conditioner

Eurofert innovative soil-improvement solutions through premium humic acid formulations derived from high-quality leonardite.

Rich in humic and fulvic acids, COLFERT Terra enhances soil structure, boosts fertility, and promotes sustainable plant growth.

Available in 5, 20 and 1000 L

Benefits:

- Stimulates strong, uniform, and continuous root development for better nutrient uptake.
- Enriches soil with organic matter, suitable for all soil types.
- Improves soil structure, infiltration, and water-holding capacity by strengthening the clay-humic complex.
